Experience

Zoho – Software Engineer   **Jan 2019 – Present**

- **Took complete ownership of the Distributed Eventlog Analyzer module**, contributing to every stage of product development and driving over $500k in annual revenue.
- Refactored legacy code, removing critical bottlenecks and **improving inter-node communication by 20%**.
- Enhanced module stability, **reducing customer-reported issues from 15 per month to zero**, significantly boosting product reliability and customer satisfaction.
- Played a key role in **system design for high-priority projects**, including the integration and synchronization of the Eventlog Analyzer's distributed edition.
- Independently developed the **licensing module** for the Log360 MSSP solution, ensuring streamlined licensing management and compliance
- Advanced the Eventlog Analyzer's central archival feature by integrating resumable capabilities into the existing file transfer protocol, improving data continuity and reliability.
- Implemented **Single Sign-On (SSO)**, greatly enhancing product usability and access management.
- Led the integration of Dark Web intelligence from Proof of Concept (POC) to release, overseeing a team of five to ensure efficient project execution and delivery.
- Created both **High-Level Design (HLD) and Low-Level Design (LLD)** for the Dark Web intelligence integration, ensuring scalability and efficient processing.
- Architected a **microservice framework** for Dark Web monitoring, allowing users to configure domains with the vendor and receive real-time breach alerts.
- Developed a **robust real-time alert processing system, enabling immediate response to breach notifications** and providing users with a comprehensive, detailed analysis of each breach.
- **Engineered security and performance-focused enhancements** for ManageEngine's EventLogAnalyzer and Log360, improving functionality, reliability, and overall product quality.

Projects

Zenzu

- Zenzu is more than a daily yoga app — It's a smart, interactive health and fitness studio right on your smartphone.
- you get real-time feedback on your moves and poses. This is the first yoga app that uses your phone's camera to track your asanas with breakthrough technology

Cliq bots

- Created several bots to streamline various daily office tasks through automation.
- **Mail summarizer** assists in summarizing and categorizing incoming emails.
- **Task generator** assists in categorizing and generating tasks based on the classifications provided by the mail summarizer.

Skills

- Java,JavaScript
- PostgresSQL, Kafka.
- Git, Tomcat, Python.

Education

Anna University   **P.S.N.A College,Dindigul**   **2015 | 2019**

- B.E in Computer Science Engineering with CGPA: 7.89

HSC   **Mount Zion Matriculation, Pudukkottai**   **2014-2015**

- Biology group. GPA: 88%
